# Luxury Tents for Exclusive Resorts and Glamping

PAVILON™ tents offer a perfect blend of elegance, comfort, and nature, making them an ideal choice for luxury resorts, glamping sites, and unique hospitality experiences. With a sophisticated design and high-quality materials, these spacious tents provide a seamless connection to the natural surroundings while ensuring the highest level of comfort.

Crafted from durable, eco-friendly materials, PAVILON™ tents are built to withstand various weather conditions while maintaining a stylish and inviting aesthetic. Thoughtfully designed interiors include premium furnishings and fully equipped bathrooms, creating a cozy yet luxurious atmosphere.

Their versatility makes them suitable for a range of applications, from exclusive accommodations and wellness retreats to restaurants, event spaces, and relaxation zones. Whether nestled in the mountains, by a lake, or in a forest, PAVILON™ tents redefine outdoor living, offering a unique blend of sophistication and nature.

# Year-Round Escapes.

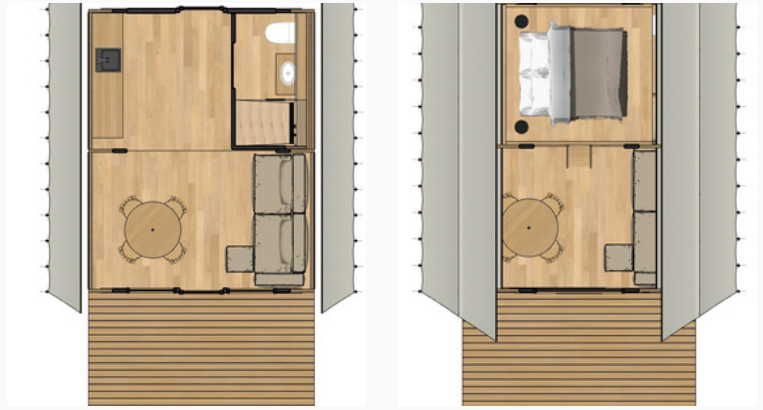

PAVILON™ tents are the ultimate choice for luxury resorts, glamping sites, and exclusive events. These elegant and spacious tents combine modern design with eco-friendly materials, ensuring both sustainability and luxury. Each tent is fully furnished, including a stylish bathroom with all the necessary amenities, making them the perfect option for high-end accommodations in the heart of nature.

Crafted with durability in mind, PAVILON™ tents feature a robust wooden structure with high-quality, weather-resistant fabric that provides excellent insulation and protection. The carefully selected materials ensure that the tents remain comfortable and functional year-round, even in extreme climates, whether hot summer days or chilly winter nights.

# Interior.

PAVILION™ tents feature a luxurious and functional interior designed for comfort and style. The spacious living area includes elegant furniture, large windows, and a cozy atmosphere, connecting guests with nature. The bedroom is equipped with a large bed and high-quality furnishings for restful sleep. The modern bathroom includes premium fixtures and a shower. Some models feature a loft area for extra space. Each tent also has a kitchenette, allowing guests to prepare meals. The interior combines natural materials with contemporary design, offering a unique and comfortable glamping experience.

# Dimensions.

The PAVILON™ tent features a thoughtfully designed layout, offering a comfortable bedroom, a fully equipped bathroom, and an open living space with panoramic views. High ceilings enhance the sense of openness, while durable, weather-resistant materials provide year-round comfort. Perfect for luxury stays, wellness retreats, or unique dining experiences, PAVILON™ combines elegance with functionality in nature.

# **Technical Information**

# PAVILON™ Tent – Technical Specifications.

---

The PAVILON™ tent boasts a robust and durable design, featuring a structure made from certified, pressure-treated KVH spruce wood. Its self-supporting framework allows for easy installation on point foundations, ensuring stability. The tent is covered with a double-layer, weather-resistant PVC material (360g/m<sup>2</sup>), providing both durability and an aesthetically warm, luxurious appearance.

The external cladding and facade are filled with high-quality insulated glazing, enhancing both the visual appeal and thermal efficiency of the structure. On the upper floor, the windows are made from safety glass, ensuring extra protection and peace of mind.

Inside, the PAVILON™ is fully furnished with stylish and functional pieces, including a spacious mezzanine, a well-equipped kitchen area, and a comfortable bathroom. The tent is also prepared for the installation of an external sanitary system and comes with electrical wiring and light fittings, ready to be connected to an external power supply. Perfect for resorts, glamping sites, or unique events, the PAVILON™ offers a perfect blend of luxury and functionality, bringing an elegant, modern touch to the natural environment.

# Flexibility of Installation/Dismantling.

---

The PAVILON™ tent is designed with ease of installation in mind. Its self-supporting, modular structure allows for quick and straightforward assembly, even without the need for complex foundations. Thanks to its lightweight construction and innovative design, setting up the PAVILON™ tent is efficient, making it an ideal solution for locations that require flexibility and quick deployment.

Versatility is a key feature of the PAVILON™ tent. Whether it's used for luxury resorts, glamping sites, event spaces, or as a temporary retreat, the PAVILON™ can easily adapt to a wide range of environments and purposes. Its functional layout ensures that it meets the needs of various applications, from accommodation to relaxation spaces or even dining and event venues.

In addition to its easy setup, the PAVILON™ tent is also highly portable. If you need to relocate or rearrange your setup, the lightweight and modular design makes it simple to move and reassemble at a different location. This mobility ensures that your investment is adaptable to different seasons, landscapes, and business needs, giving you the flexibility to make the most out of any space.

# Heating, cooling, and ventilation system

---

NOMADE PAVILON line are equipped with modern and efficient heating, cooling, and ventilation systems, ensuring comfort throughout the year.

## **Premium Version – Air-to-Air Heat Pump (split)**

An advanced air conditioning and heating system that automatically adjusts the temperature, ensuring optimal indoor conditions. Manual control, remote control via the internet, and integration with a smart building system are possible. To achieve independent temperature control in each room and enable window open detection, three separate internal and external units are required.

## **Basic Version – Electric Radiant Heater**

An economical solution allowing temperature control and programming via WiFi. This system does not offer cooling functions.

## **Ventilation of the Mobile Homes**

Standard mobile homes are equipped with gravity ventilation, ensuring natural air exchange. Additionally, mechanical exhaust systems are used in bathrooms and toilets to enhance the efficiency of ventilation in these areas.

# Utility Connection System for Mobile Homes

---

PAVILON have been designed with ease of use and quick connection to essential utilities in mind. Thanks to simple and flexible solutions, the connection to water, electricity, and sewage systems is fast, convenient, and adaptable to various site conditions.

## **Water Connection**

PAVILON™ luxury glamping tents are designed with convenience in mind, offering easy water connection for a hassle-free setup. The tents are equipped with pre-installed plumbing systems, making it simple to connect to an external water source. For colder climates with freezing temperatures, the plumbing system is carefully designed to be below the frost line, with insulated pipes and optional heating cables to prevent freezing during winter months. In warmer climates, connecting water is easy with garden hoses and quick connectors, ensuring fast and efficient installation.

## **Electricity Connection**

Each PAVILON™ glamping tent comes with a fully integrated electrical system, which includes wiring, sockets, switches, and lighting. The tents are equipped with a central distribution board that allows easy customization and future expansion of the electrical setup. Whether adding additional devices or changing the electrical layout, the PAVILON™ tent can be adjusted to meet your specific needs. With modular designs, the electrical system can be connected in a single circuit, ensuring safety, reliability, and synchronization throughout the entire structure.

## **Sewage Connection**

PAVILON™ tents offer an effective internal sewage system that ensures seamless disposal of wastewater. Customers can choose to connect to the local sewage network, septic tanks, or ecological sewage treatment plants, depending on the local conditions and preferences. The system is designed for easy installation with ready connectors, allowing quick and simple connection to existing infrastructure. This ensures that all utilities are activated without any hassle, providing full functionality and comfort in your luxury glamping experience. With easy installation, robust functionality, and environmentally-friendly solutions, PAVILON™ luxury tents ensure that your glamping setup is as seamless and comfortable as possible, no matter the location or season.
